

dilution testing kit

Announcing the arrival of the dilution testing kit, essential for **HACCP** verification

See our website for more information:
www.antecint.com

- Dip the strip into the solution for 1-2 seconds
- Remove & gently allow excess solution to run off
- Read by comparing to the colour chart. Full colour formation takes a couple of seconds after removing the strip from the solution
- That colour should be read within 10 seconds

	2.0%	Sample colours shown left for Virkon S as an example only - please match to individual product swatches on product labels.
	1.5%	
	1.25%	
	1.0%	
	0.75%	
	0.5%	
	0.4%	
	0.25%	

✓ the right product at the right strength

- ✓ Check dilution of prepared solution
- ✓ Calibrate dosing equipment
- ✓ Check activity of foot dips
- ✓ Check for dilution on the surface being treated - and not just the solution coming out of the lance

DILUTION TESTING KITS for all products - no compromise on product choice (Biosolve, HD3, Virudine, LongLife 250S, Virkon S, Hyperox, Ambicide, DSC 1000, Farm Fluid S and Traywash)

SAVE MONEY and avoid wasting product - but be confident you have the right strength

EASY TO USE - dip and check

INSTANT RESULTS
